

**Marked-Up Version of the Claims:**

- Claim + 12 (previously present): A computer system for enabling a simultaneous combination of techniques including intelligent searching for, problem solving with, and valuation of intellectual property, while providing model mapping of said techniques' results regarding said intellectual property in a meaningful manner with a user interface device, said computer system comprising;

5                   (1) (a) at least one server computer;

10                  (2) (b) one or more client computers connected to said server computer via a global area network and one or more computer programs executed by one or more server computers;

15                  (3) (c) wherein said computer program further comprises computer instructions for:

20                  storing, retrieving, and searching for information regarding said intellectual property corresponding to a technology sector within a technology exchange in and from a database, storing, retrieving, and searching problem solving solutions related to said intellectual property in and from a database, storing, retrieving, and searching scientific and engineering publications related to said intellectual property in and from a database;

25                  (4) (d) allowing for searching, retrieving, and storing into and from said database or databases information regarding said intellectual property within said technology exchange, said problem solving database, and said science and

engineering database, resulting in model mapping and valuing said intellectual property according to one or more search criteria specified by a user.

- Claim 2 13 (currently amended): The computer system of claim 1, wherein said intelligent searching includes accessing stored information contained within an electronic patent searching and retrieval system, an electronic patent valuation system, a science and engineering technology literature searching and retrieval system, and an engineering and science problem solving searching and retrieval system wherein said intelligent searching provides;
  - 10 (1) (a) answers to queries regarding any aspect of said intellectual property, including instantaneous real-time determination of a value of said intellectual property;
  - (2) (b) determination of assignee or assignees;
  - (3) (c) determination of any prior art associated with said intellectual property;
  - (4) (d) determination of any inventors associated with said intellectual property;
  - 15 (5) (e) determination of any patents and patent applications associated with the international and U.S. classification of said intellectual property where said property is itself a patent;
  - (6) (f) determination of any past and current uses and users of said intellectual property;
  - 20 (7) (g) prediction by said model mapping of a value, trend, or existence of current intellectual property and prediction by said model mapping of said value, trend or existence of future intellectual property.

- Claim 3 14 (previously present): The computer system of claim 1, wherein any permutation and combination regarding techniques includes intelligent searching for, problem solving with, and valuation of intellectual property, while providing model mapping of said intelligent searching and valuation results is optionally simultaneous and optionally includes a simpler combination of said techniques.

5

- Claim 4 15 (previously present): The computer system of claim 1, wherein said combination of techniques including intelligent searching for, problem solving with, and valuation of intellectual property, while providing model mapping of said intelligent searching and valuation results is optionally simultaneous and optionally includes a simpler combination whereby only intelligent searching together with valuation of intellectual property while providing model mapping is provided.

10

- Claim 5 16 (previously present): The computer system of claim 1, wherein a second simpler combination includes problem solving using knowledge management based systems together with valuation of intellectual property based systems while providing model mapping.

15

- Claim 6 17 (currently amended): The computer system of claim 1, wherein a third simpler combination includes electronic patent searching and results of said searching for specific intellectual property and simultaneous and ~~instantaneous or near instantaneous~~ real-time valuation of said patented intellectual property while providing model mapping.

20

- Claim 7 18 (currently amended): The computer system of claim 1, wherein a fourth simpler combination includes electronic non-patent searching and results of said searching for specific non-intellectual property and simultaneous and ~~instantaneous or~~

~~near instantaneous real-time~~ matching of said non-intellectual property with said patented intellectual property while providing model mapping.

- Claim 8 19 (currently amended): The model mapping of ~~claims 1-7~~ claim 1 where said model mapping includes topographical features optionally including colors, numbers, or symbols representing intellectual property value and direction of increasing and decreasing value of said intellectual property.
- Claim 9 20 (currently amended): A computer implemented method for enabling optional simultaneous and ~~instantaneous~~ real-time or optional simultaneous or optional ~~instantaneous~~ real-time review of data containing files comprising:

- 10        (1) (a) patents, patent applications, and publications as they appear in an electronic patent shoe or otherwise, science and engineering technology literature pertinent to said patents and patent applications and publications from electronic databases, and problem solving solutions pertinent to said patents and patent applications and publications from electronic an database;
- 15        (2) (b) allowing for evaluation of said review and pertinent ~~instant or near instant~~ real-time valuation methods of said patents or patent applications and publications comprising the steps of;
- 20        (3) (c) causing generation of an electronic patent shoe with optional ~~instant~~ real-time access to said science and engineering technology literature review, problem solving solutions review, and valuation methods comprising minimally a plurality of patents, and optionally said technology literature, and said problem solving solutions;

Reply to Office Action dated Dec. 13, 2003 and Preliminary Amendment to RCE

(4) (d) causing access to a user interface device to distribute, by means of an audio or visual or audiovisual display, in a meaningful manner, at least a list of patents and associated pertinent valuations of said list of patents in an instantaneous a real-time fashion and optionally allowing access and subsequent distribution to problem solving solutions and technology literature associated with and pertinent to said list of patents and associated valuations;

5

(5) (e) causing, pursuant to a command to view or hear a next file comprising said patents and associated valuations, said problem solving solutions and said technology literature, retrieval and audible or visual or audio-visual display of image or text data of both image and text data representative of at least a portion of said next file;

10

(6) (f) causing, pursuant to a command to view or hear a previous file, retrieval and distribution of at least a portion of said previous file; and

(7) (g) allowing a user to scroll back and forth between steps (e) and (f) with no limitations and to provide reports with or without model mapping that capture any desired portion of said visual or audible or audiovisual displays.

15

- Claim 10 21 (currently amended): The computer implemented method of claim 9 20 comprising sequential steps of;

20

(1) (a) causing generation of a problem solving solutions review with optional instant real-time access to said science and engineering technology literature review, said electronic patent shoe, and said valuation methods comprising

minimally problem solving solutions, and optionally said technology literature, and a plurality of patents and;

5

(2) (b) causing access to a user interface device to distribute, by means of an audio or visual or audiovisual display, in a meaningful manner, at least of a problem solving solutions review of patents and associated pertinent valuations of said list of patents in ~~an instantaneous or near instantaneous~~ a real-time fashion and optionally allowing access and subsequent distribution to problem solving solutions and technology literature associated with and pertinent to said list of patents and associated valuations;

10

(3) (c) causing, pursuant to a command to view or hear a next file comprising said solutions, said patents from said electronic patent shoes and said technology literature with said value of said patents retrieved from said electronic patent shoe based on said solutions, retrieval and audible or visual or audio-visual display of image or text data or both image and text data representative of at least a portion of said next file;

15

(4) (d) causing, pursuant to a command to view or hear a previous file, retrieval and distribution of at least a portion of said previous file;

20

(5) (e) allowing a user to scroll back and forth between steps (b), (c) and (d) with no limitations and to provide reports with or without model mapping that capture any portion of said visual or audible or audiovisual displays.

- Claim 11-22 (currently amended): The computer implemented method of claim 9-20 comprising sequential steps of;

(1) (a) causing generation of a valuation of intellectual property with optional instant real-time access to said science and engineering technology literature review, said electronic patent shoe, and said problem solving solutions review comprising minimally valuation solutions, and optionally said technology literature review results, electronic patent shoe searching results and problem solving solution results;

5

(2) (b) causing access to a user interface device to distribute, by means of an audio or visual or audiovisual display, in a meaningful manner, at least a list of associated pertinent valuations of said list of patents, a problem solving solutions review of patents in ~~an instantaneous or near instantaneous~~ a real-time fashion and optionally allowing access and subsequent distribution to problem solving solutions and technology literature associated with and pertinent to said list of patents and associated valuations;

10

(3) (c) causing, pursuant to a command to view or hear a next file comprising said valuations from said associated patents from said electronic patent shoes, associated problem solving solutions and associated technology literature, retrieval and audible or visual display of image or text data or both image and text data representative of at least a portion of said next file;

15

(4) (d) causing, pursuant to a command to view or hear, view and hear a previous file, retrieval and distribution of at least a portion of said previous file;

20

(5) (e) allowing a user to scroll back and forth between steps (b), (c) and (d) with no limitations and to provide reports with or without model mapping that capture any portion of said visual or audible or audiovisual displays.

Remarks

As suggested by the examiner, the following changes have been made to the original application:

5     ▪ Claims 1, 2, 3, 4, 5, 6, 7, 8, 9, 10 and 11 are cancelled.

▪ Claims 12, 13, 14, 15, 16, 17, 18, 19, 20, 21 and 22 which were previously numbered as claims 1, 2, 3, 4, 5, 6, 7, 8, 9, 10 and 11 respectively are amended by inserting ‘real-time’ in lieu of ‘instantaneous’, ‘instant’ or ‘near instant’ with the necessary formatting.

10    ▪ Specification of the invention is amended so as to highlight all the proprietary trademarks appropriately, specifically on page 2 (line 23), page 3 (lines 6,11, 15 and 20) and page 5 (lines 4, 5, 9, and 10).

▪ The word ‘also’ is amended to ‘several’ on page 4 (line 15) of the specification.

▪ The specification now includes reference to the book ‘Rembrandts In The Attic’ by Kevin Rivette and David Kline on page 2 (lines 16, 17, 18, 21 and 22). Also a photocopy of the pertinent pages from this book is included.

15    ▪ A clean version of the substitute specification incorporating all the above-mentioned amendments is presented.

▪ Figures 1, 2, 3, and 4 are amended so as to represent all of the elements of the flow charts with their corresponding symbols. As per example, in figure 1, user input (user query) is represented by a parallelogram, a process is represented by a rectangle and databases are represented by parallelograms with curved sides. Similarly, in figure 2, a diamond represents a decision and the end of flow chart is represented by an oval.

20

Appl. No. 09/896,238

Amdt. dated Jan. 27, 2004

Reply to Office Action dated Dec. 13, 2003 and Preliminary Amendment to RCE

- Figure 6 is now properly inserted.

▪ Detailed description of the drawings now contains reference to the element of the drawing that is being described. Amendments have been made on page 7 (lines 3, 4, 5, 6, 7, 8, 9), page 8 (lines 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 14, 18, 19, 20, 21, 22), page 9 (lines 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23) and page 11 (lines 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23) in this regard.

▪ A new section entitled Brief Description of Drawing is included to describe the purpose of each and drawing.

10 ▪ In the 'Detailed description of the invention section' individual processes are now numbered and shown appropriately in the drawings. Amendments have been made on page 15 (lines 3, 4, 5, 6, 7, 8), page 16 (line 4), page 17 (line 4), page 18 (line 7, 14), page 19 (lines 1, 13) and page 22 (line 1) in this regard.

15 Finally, the changes as listed above in this Preliminary Amendment and as discussed with Examiner Mizrahi on 12/13/03 should place this application in condition for allowance. and a notice of allowance is earnestly solicited.

20

Dated this 27th day of January, 2004

Respectfully Submitted,
